Outside Works

**Time & Attendance application
for travelling workers**

Intuitive, flexible and adaptable.
This tool allows employees to
clocking in/out of work from
a mobile device (Android / iOS).

ref.: OutsideWorks - rev.: EN103
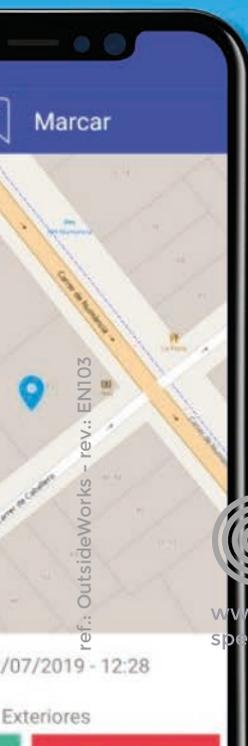

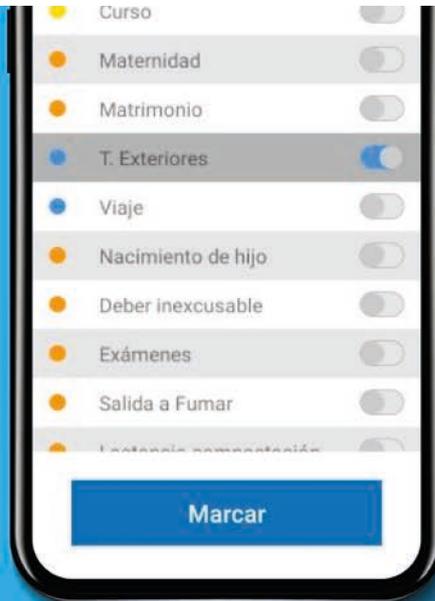

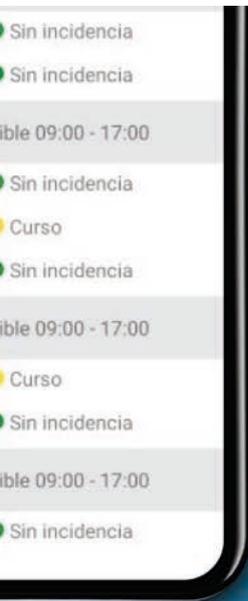

Compatible with netTime and SPECManager time management applications.

Características

OutsideWorks is the perfect tool for companies that have travelling workers - who do part of their work outside the company premises (technicians, sales staff, contractors, etc.) - and who must keep track of the exact time worked during their shift.

· Lets employees register when and where their working day starts and ends.

· Adds the location data to each clocking event.

· Proposes to record specific events (medical check-up, examination, physical indisposition, training course, transport problem, etc.).

· The clocking event data is instantly transferred to the Time & Attendance application (netTime or SPECManager).

· Displays the assigned working calendar.

· Displays clocking events from every source.

· Displays counter values synchronised with the Time & Attendance application (netTime or SPECManager).

· Biometrics can be activated to start and cloking.

OutsideWorks speaks your language:
- Castellano.
- Català.
- English.
- Français.
- Português.

Prerequisites

Functionalities

CLOCKING IN/OUT

The employee simply needs to indicate the type of activity that is beginning or ending. The location of the mobile device can be activated and appears on the cloking.

CLOCKING EVENTS

Displays all the employee's clocking events, the ones made from a mobile device and also those made from the wall terminals.
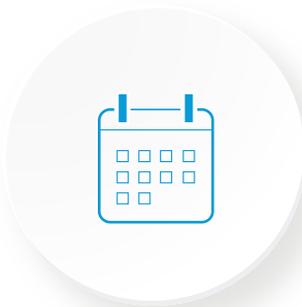

CALENDAR

Displays the work schedule of the employee who can consult his schedule, bank holidays and previous or missing clocking events.

CURRENT STATE

Displays the details of the last clocking event along with the values of the updated counters.

VIRTUAL CARD

It allows clocking in a SPEC reader with Bluetooth® as if it were a Mifare® proximity card.
